

Cardio-HART™

(a.k.a. "CHART")

Cardio-HART™ is a, non-invasive, cardiac diagnostic system for the early detection of ~93% of all common heart diseases including:

DAY 1
DIAGNOSIS

Heart Failure (HF),
Heart Valve Disease (HVD),
Atrial Fibrillation (AFib),
Myocardial Infarction (MI) &
Ischemia.

Compare with ECG at only 40%...

Cardio-HART is a game changer!

Diagnostic functionality of
3 medical devices in 1:

- (1) 12 Lead ECG,
(2) Echocardiography, and
(3) Phonocardiography.

=

Cardio-HART

- is a direct substitute for ECG in clinical care settings
- fits directly into existing clinical workflows and Standard of Care
- can be learned in less than 20 min by a trained ECG assistant

- is clinical proven in a study designed with FDA assistance
- enables early detection of heart disease onset
- enables Day-1 detection of heart disease on patient presentation

CHART is ECHO for PRIMARY CARE

Cardio-HART provides advanced diagnostic information to aid clinicians better understand their patient's cardiac status and determine the patient pathway, whether keeping them in Primary Care or referring them to Secondary Care.

! ECG is no longer enough !

- Cardio-HART™ is CE Certified, MDD – 168. May 2021
- MHRA authorized and registered, Sep 2021.
- Cardio-Phoenix is ISO13485:2016 certified since 2018.
- NHS registered Insurance Policy of £5Mn/incidence, DHMIA/2227/21
